Documentation on the property/district is presented in:

#BA 157 (Bowlin, 1986); Project Review & Compliance Files; Spring Grove Architectural Survey Notebook

Description of Property and Eligibility Determination: *(Use continuation sheet if necessary and attach map and photo)*

Spring Grove Hospital Center, Catonsville, Baltimore County was initially determined eligible for the Maryland Register of Historic Properties in 1986. Trust policy is that any property eligible for the MRHP is also eligible for the National Register of Historic Places. Spring Grove is eligible under Criterion A, events, as the first state-sponsored facility for the mentally ill. The hospital had its origins in 1797 where the indigent sick and insane were cared for in Baltimore. By 1872 the hospital had outgrown its site and the state chose a new 200-acresite in Catonsville. The District is also eligible under Criterion C, as an architectural example. The hospital center does not have a specific layout, but rather its growth and development are demonstrated through the construction of buildings in response to new needs and developments in the care of the mentally ill. The 1985 survey included 25 buildings built between 1872 and 1944. All are eligible contributing resources to the historic district.

[*from Spring Grove Hospital Center DOE]

As a result of the recently completed survey, 25 buildings have been determined to be historically and architecturally significant to the development of public mental health care in Maryland at Spring Grove Hospital Center.

This property, BA-2329, Masonry Shop, was included on the list of significant properties.

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The Masonry Shop, located east of the Firehouse, is a one story, corrugated metal building. Built in 1924, the function of the building has always been concerned with the operation and management of the hospital campus. The building measures six bays long and two bays wide. The gable roof is corrugated tin as well. The design of the structure is quite plain.

The building rests on a cement foundation. The windows are one single sash but some vary between one and two panes. The south facade displays a wooden door with a wooden surround and sill. The door is partially sealed with plywood. A deteriorating gutter runs along the eave. Three metal air vents equipped with fans break the roof line.

The east and west walls show the gabled end with closed verges. Large double doors appear on these walls. While the western door is a clapboard stable door with a cement sill, the eastern double door is metal, has a wooden surround, and no visible sill.

Prepare both a summary paragraph of significance and a general statement of history and support.

The Masonry Shop is a one story, metal building which has functioned as part of the maintenance operation of the hospital. Erected by the hospital in 1924, the Masonry Shop likely played an active role during the large construction projects of the 1930's due to its function. Though quite plain at its construction, the Masonry Shop has experienced only minor alterations. The Masonry Shop strongly resembles the Paint Shed and together the two buildings comprise the group of corrugated metal buildings on Spring Grove's complex.
